For Eligible Colleagues and Retirees

Pfizer Zero Cost Prescription Drug List for 2027

This document highlights the Pfizer prescription drugs (when no generic is available) that are covered at 100 percent (if applicable, based on your Pfizer medical coverage option) when dispensed through a pharmacy under Pfizer-sponsored prescription drug coverage for eligible participants.

This list is subject to change as new medications are added, and some are removed. If you have a question about coverage for a specific Pfizer medication, please contact your prescription drug administrator.

Note:

- Pfizer medications administered in your home or at a provider's office or facility are generally covered as a medical service under Pfizer's medical plan. Contact your medical plan administrator for coverage details;
- Pfizer medications (when a generic is available), such as Accupril, Pristiq, and Protonix, are covered at the same cost-sharing level as non-Pfizer medications and therefore not covered at zero cost;
- **For U.S. Colleagues enrolled in the HSA Copay option or U.S. Non-Medicare Eligible Retirees enrolled in the HSA-Eligible PPO option:** All Pfizer medications are subject to the deductible, except those on the HSA Preventive Drug List; and
- **For U.S. Retirees:** Certain U.S. retiree prescription drug options may not cover the medications on this list at no cost. Additionally, for ***Medicare-Eligible Retirees enrolled in the Rx Base:*** Remember that non-Medicare Part D and non-formulary medications, including Pfizer medications, are not covered under Rx Base. Refer to your plan materials for more information including information about the Platinum formulary.

Agents for Gaucher Disease
Elelyso
